**BEFORE THE  
PUBLIC UTILITIES COMMISSION  
OF THE STATE OF CALIFORNIA**

Application of Southern California Edison Company (U-338-E) to Recover O&M Costs Associated with the San Onofre Nuclear Generating Station Units Nos. 2 and 3 On-going Seismic Program, and New Seismic Research Projects and Analyses

Application 11-04-006

**MOTION TO INTERVENE  
OF PACIFIC GAS AND ELECTRIC COMPANY (U 39 E)**

Pursuant to Rule 1.4 of the Commission's Rules of Practice and Procedure, Pacific Gas and Electric Company files this motion to intervene in the above-captioned proceeding. In this Application, Southern California Edison Company ("Edison") requests authority to recover in customer rates the O&M costs associated with its on-going seismic program and new seismic research and analysis related to continued safe operation of those facilities and in response to recommendations made by the California Energy Commission ("CEC") that additional seismic studies be performed at the two operating nuclear facilities in California, SONGS and Diablo Canyon Power Plant.

PG&E submitted, and the Commission approved in Decision 10-08-003, a substantially similar Application, A.10-01-014 to the instant Application. Specifically, PG&E requested and received Commission approval of ratepayer funding to perform additional seismic studies recommended by the CEC. On September 23, 2011, PG&E filed a motion to re-open that proceeding and for the Commission to authorize funding in addition to that authorized in D.10-08-003.
